

**Lake/Pond Name:** Beaverdam Lake

**Specific Waterbody (if applicable):**

**Date:** 6/8/2007

**Biologist:** Jeffrey Horn

**Survey Method:** airboat

**Fax:**

**Contact:** Tom Corl

**E-Mail:** [REDACTED]

**Profile DO** 9

**Visibility (Secchi, 7')**

**Temp (C)** 73 F

**pH** 8.25

**Aquatic Vegetation species present:**

**Algae species present:**

*Potamogeton crispus*

*Potamogeton pectinatus*

*Spirogyra*

Curlyleaf Pondweed

Sago Pondweed

Filamentous algae

**Comments, conditions, concerns, clarity:**

- \* Dense Curlyleaf Pondweed found growing in 1' - 5' of water mixed with sparse Sago Pondweed. Sparse Curlyleaf pondweed in deeper water.
- \* No plants were observed in water deeper than 6'.
- \* Filamentous algae scattered along shoreline.

**Density Depictions**

**None**

**Trace**

**Sparse**

**Moderate**

**Dense**

**Treatment:**

Cutrine Plus was applied to treat algae. Notifications were posted.
