

DLA-20

Alcohol and Drug Assessment Tool

Anyone in Orange County who has been trained in the current DLA-20 Mental Health Assessment Tool is invited to attend the two hour session on the DLA-20 Alcohol and Drug Assessment Tool on January 30th. * All other sessions are four hours and do not have a pre-requisite. The tool is a modified version of the original tool and appropriate for those working with clients that have a primary Substance Use Disorder diagnosis or have both a Mental Illness and Substance Use Disorder diagnosis.

Mental Health Training

The DLA-20 is a nationally promoted Functional Assessment Tool that is quickly administered to examine 20 areas of Daily Functioning and create a reliable Global Assessment of Functioning (GAF) Score.

As part of our ongoing commitment to improve the communication and planning process for children and families in need of behavioral health services who are involved in the child welfare system, the DLA-20 is being implemented and expanded as a tool to assist clinicians, child welfare staff, Family Court and court stakeholders.
