

# Village of Walden – Pine Street Pump Station

## CDBG-DR Information Sheet

Village of  
Walden- Pine  
Street Pump  
Station

National Objective: LMA – 43.95%

Project Began in 2017

Project will be Completed in Dec 2020

Awarded: \$528,950.00

Expended to Date: \$351,455.95

- Activities include the elevation and restoration of the storm damaged pine street sewage pump station located at the intersection of pine street and maple street--along the Wallkill river.
- During hurricane Irene and Tropical Storm Lee, flooding of the intersection precluded access to the pump station. The pump room, pumps and generator were flooded and non-functional. Raw sewage was discharged to the street and the Wallkill river. Renovation of the pump station would address the spill and public health issues by locating pumps, controls and the generator above the 100-year base flood elevation.
