

TRAINING BULLETIN

RESPIRATORY PROTECTION PROGRAM (PortaCount)

This course is designed for the agency's respiratory protection program administrator as defined in 29 CFR 1910.134 OSHA Respiratory Protection Standard. Curriculum content outlines the requirements of the Respiratory Protection Program standard for emergency escape devices, air purifying respirators (negative pressure) and self-contained breathing apparatus (positive pressure). In addition, training is provided on the procedures and equipment to conduct a quantitative fit test.
