PRINCIPLES OF FIRE INVESTIGATION

Trains fire officers and entry-level fire investigators to determine the origin and cause of fires, as required by NYS law, addressing NFPA considerations for conducting such investigations. This course provides a basic understanding of fire behavior and its value in determining a fire's origin and cause. It includes basic building construction; determining points of origin and causes; accidental fires; incendiary and vehicle fires, and those elements necessary to assist in their determination, including scene documentation and interviewing techniques.
