

TRAINING BULLETIN

The Challenge of Pesticides and Poisons

Develops skills necessary to safely stabilize a hazardous materials incident involving pesticides and poisons. Includes procedures to correctly identify materials, determine their toxicology, and develop strategies to manage the incident. Case studies examine the dangers of these materials and the lessons to be learned from actual incidents.

Designed for: All emergency response personnel

Course Length: 12 hours

Prerequisites: None

Min / Max # of students: 10 / 40
