

## TRAINING BULLETIN

# Alternative Fueled Vehicles & New Vehicle Technology (Hybrid Vehicles)

Provides information about the hazards of the new fuels, such as methanol, CNG, and electric power, the pressures created within fuel cylinders, as well as safety information on other hazards that may be present at incidents involving an alternative fueled vehicle. The second portion of the program deals with the changing technology of the automobile. Intended to provide new information for those students who may have completed Accident Victim Extrication Training (AVET) in the past and have a need to update information about changes to the newer vehicles.

<b>Designed for:</b>	All emergency response personnel
<b>Course Length:</b>	4 hours
<b>Format:</b>	Seminar
<b>Min / Max # of Students:</b>	10 / 70
