

TRAINING BULLETIN

Hazardous Materials First Responder Operations

This course prepares emergency response personnel to effectively and safely respond to and stabilize incidents involving hazardous materials from a defensive position. It meets the training requirements of OSHA 1910.120 for the first responder, both at the awareness and operations levels. It includes recognizing and identifying hazardous materials, classifications and the hazards of each class, transport vehicles and associated hazards, planning for incidents, personal protective equipment for the first responder and its limitations, and confinement methods and decontamination procedures. Case studies identify appropriate operational procedures.

Designed For:	All emergency response personnel
Course Length:	15 hours
Prerequisites:	None
