

TRAINING BULLETIN

Clandestine Drug Labs

This awareness level course will provide first responders with information that would help identify situations that may involve an illegal drug manufacturing operation. The manufacturing of drugs such as Meth-Amphetamines uses a wide variety of hazardous materials and pose special risks from fire and explosion when being cooked. Labs are being discovered in residential dwellings, garages, basements, motel rooms, and other unsuspecting locations. This course will provide participants with information as to the making of the drug along with appropriate procedures to be considered for the safety of responders.

Designed for: All first response personnel

Course Length: 3 hours

Prerequisites: None

Min/Max # of Students: 10 / 30
