

WORKERS' COMPENSATION AND DISABILITY BENEFITS
WORKERS' COMPENSATION LAW, SECTION 57 AND SECTION 220,
SUBDIVISION 8

Worker's Compensation Law requires that all municipal and State entities ensure that businesses applying for permits, licenses, or contracts have appropriate workers' compensation and disability insurance benefits. This requirement applies to both original and renewal applications.

The New York State Department of Health that over sees our operation has issued guidance mandating all local departments of health conform to the New York State Workers' Compensation Law. Effective immediately all original and renewal applications for operating permits must be accompanied by an appropriate form designated by the State Workers' Compensation Board attesting that the required benefits are provided or the operation is exempt. The required forms are available through your insurance carrier or, in the case of exempted operations, are available from the State Workers' Compensation Board. You may contact the Board at (877) 632-4996 or visit their web site at www.wcb.state.ny.us. The Workers' Compensation Regional Office serving this area is located at:

Peekskill District
41 North Division Street
Peekskill, NY 10566
(866) 746-0552

Our office will not accept applications nor will we issue a permit to an operation that has not documented compliance with the Workers' Compensation Law.
