### Introduction: 40 Developmental Assets

Research by Search Institute has identified 40 concrete, positive experiences and qualities—"developmental assets"—that have a tremendous influence on young people's lives and they are things that people from all walks of life can help to nurture.

Listed below are the 40 developmental assets that youth need to grow up to be competent, caring and healthy. Helping youth to develop these assets depends primarily on individuals—parents, grandparents, teachers, neighbors and many others—building positive relationships with children and teenagers. Nearly all children and adolescents need more developmental assets than they now have. While it is crucial to pay special attention to those children who have the least economically and emotionally, the challenge is to reclaim the kind of community-wide attention to positive development that will impact ALL young people.
